

## DRAFT CHOICE™

# Low Foam Bar Glass Wash

*For Electric Brushes  
and Automatic Glasswashers*

The professional's choice for manually washing all types of glassware in bars, taverns and other foodservice glass washing operations. Contains special low foaming surfactants, descaling and sheeting agents for complete, spot-free cleaning of glassware. Ideal for use with automatic bar glass washers with electric brushes. Assures sparkling results.

### Directions for Use

**Washing With Automatic Brushes:** For standard 3 gallon bar sinks, fill sink with clean, warm water up to approximately 1" from top of brushes. Add ½-1 ounce of this product into tank, sprinkling over brushes. Turn on brushes to agitate solution and dissolve powder. Press glassware onto spinning brushes, making sure to penetrate as deeply as possible into bottom of glass to maximize cleaning. Also make sure that the rim of the glass comes into contact with the brushes to remove lipstick marks. Rinse glass in clean running water in second tank to remove detergent residue followed by an immersion in a sanitizing solution in the third sink. Drain glassware upside down on corrugated drain board to improve air flow and facilitate drying. Do not dry glassware with a towel, which can transfer germs and leave lint on the glass. Do not drain glassware on a towel or rubber drain pad. Recharge first sink with fresh water and detergent once daily or when solution becomes visibly soiled.

**Washing With Stationary Brushes:** This product is also suitable for manually washing bar glassware with stationary brushes. Follow the procedure above for automatic brushes. Where a three brush system is employed, use the center brush for best results. Make sure to scrub all interior and exterior surfaces completely, especially the rim. Stationary brushes require more scrubbing time and effort to achieve completely clean glassware. Follow directions above for rinsing, sanitizing and drying.

### Safety Reminder

Consult product label and Safety Data Sheet (SDS) before use. SDS's may be downloaded from [www.crown-chem.com](http://www.crown-chem.com).

### Technical Specifications

Appearance	White Powder
Odor	Characteristic
pH (1% solution, 22°C)	<6.0
Foaming	Low
Flash Point	NA
Density (lbs/gal, 22°C)	8.00 ±0.1
Stability Range	40-100°F
Alkalinity (as Na <sub>2</sub> O)	Very Low
Solubility (in H <sub>2</sub> O, 22°C)	100%
Phosphate Content (as P)	None

### Product Number

18250  
18262

### Packaging

100x½ oz. case  
6x2 lb. case
